supervises

# Turn every "Buy" click into an intelligent, automated workflow.

Ordely is an embedded AI Sales & Order Agent for B2B e-commerce that validates, executes, and tracks orders.

# Trigger

# Analysis

# Execution

# Tracking

Activated on "Buy" or  
"Add to cart"

Order validation, fraud  
checks, pricing rules

Reserve stock, call  
suppliers, create shipments,  
trigger payments

End-to-end status synced  
directly to CRM/ERP

# Seamless Symphony.

Orchestrating tasks and sending events to stakeholders in real time through secure APIs.

# Zero Stockouts. Zero Delays.

Ordely monitors inventory thresholds, automatically notifies or calls suppliers, and creates purchase orders to replenish stock before sales are lost.

# The Commercial Impact

| Manual Chaos                                                                                                                                                                                                                                                                                                                           | Intelligent Automation                                                                                                                                                                                                                                                                                                                             |

# Supervision, Not Replacement

Live dashboards, real-time alerts, and manual override options ensure your sales teams retain final approval when needed.

## Security

Enterprise-grade encryption.  
Role-based access. Audit  
trails. GDPR compliance for  
EU customers.

## Pricing

SaaS monthly subscription.  
Priced by transaction  
volume. Optional premium  
connectors for legacy ERPs.

# Enterprise Scale

(Rollout across the full catalog  
and external supplier network)

## Measure KPIs

(Prove processing time, error rate,  
and fulfillment cost reductions)

## 6–8 Week Pilot

(Deployed strictly on selected  
high-value SKUs)

## Technical Demo & Integration Review

(For direct e-commerce,  
manufacturers, wholesalers,  
and distributors)

# Transform your website into an autonomous commercial agent.

Request a tailored pilot.
